MARITIME SHORT RANGE OPERATOR'S CERTIFICATE (MSROC)

A requirement for anyone wishing to operate a Maritime VHF Radio in Europe, and a prerequisite for the RYA Yachtmaster Certificates of Competence.

Aim: To learn the Global Maritime Distress and Safety System (GMDSS) and enable one to receive Distress, Urgency, and Safety alerts and routine messages via a VHF Digital Selective Calling (DSC) equipped maritime radio transceiver.
Duration: 8 Hours
Qualification: Maritime Short Range Operator's Certificate

Maritime Short Range Operator Certificate Online Study

The MSROC Course is available online, making it easy to study from the comfort of your own home. It is available nationwide from Coastguard Education. Students will have up to 4 weeks to complete the course.

Assessment

The assessment for MSROC is both written and oral and is approximately 1.5 hours in duration. Please contact us on 0800 40 80 90 to find where your nearest assessor is.
